

PUBLIC OVERVIEW

Transform your ideas into great outcomes.

...we help people plan, build and grow useful digital services.

SERVICES • PROGRAMMES • LEARNING • PRACTICAL IDEAS

Good ideas need more than a good start.

Value appears when
the work is clear,
usable and supported.

- 01 Solve a real need**
Begin with the people, work and constraints, not the tool.
- 02 Prepare for real use**
Connect delivery, operations, learning and support.
- 03 Learn what to improve**
Use feedback and service evidence to guide the next decision.

Vantforge connects these parts around one useful outcome.

Start from where you are.

The route changes with the situation. The focus on outcomes stays.

01

Plan

Clarify the people, problem and first useful result.

02

Build

Create, connect, test and prepare the service for use.

03

Grow

Learn from evidence, remove friction and strengthen adoption.

Bring the situation. We will help shape a sensible first step.

FIVE PRACTICAL AREAS

Different skills, joined around one outcome.

We bring in the mix the work needs. The disciplines support one another rather than compete for attention.

01	Product work	PRODUCT & IMPLEMENTATION	Shape the service and keep delivery moving. AI-Assisted Coding supports fast, reviewed builds.
02	Go-to-market systems	GTM ENGINEERING	Connect the offer, journey, tools, onboarding and follow-up around the right users.
03	Data foundations	DATA ENGINEERING	Create reliable data flows, quality checks and measures that answer real decisions.
04	Learning and adoption	LEARNING DESIGN	Help people understand, practise and use the service with confidence.
05	AI and automation	WORKFLOW AUTOMATION	Reduce repeated work, with human checks where judgement matters.

OUR APPROACH

A simple method keeps the pieces connected.

Product, data, learning and technology stay connected from the first question to the next result.

OUTCOMES

The real measure is what changes after delivery.

BETTER

Technology matters. So do people, process and evidence.

- 01 **Clearer decisions.**
- 02 **Services ready for real use.**
- 03 **Data people can trust.**
- 04 **People confident to adopt.**
- 05 **Less repeated work.**

PUBLIC IMPACT THEMES

Experience spans services, programmes and tools.

These examples are intentionally anonymised and focus on the contribution and practical result.

DIGITAL FINANCE	Coordinated product, operations, banking and technology around a usable launch route.
SMALL BUSINESS SERVICES	Connected onboarding, support, data and suppliers around steady growth.
PUBLIC SERVICE LEARNING	Turned participant feedback and evidence into decisions for the next delivery cycle.
INTERNAL TOOLS	Shaped clearer reporting flows so issues were easier to understand and act on.

Four routes make the wider work easy to explore.

Each expression begins with a plain purpose and a useful next step.

01

Vantriculum

Shape a focused learning plan and show progress through evidence.

02

Vantxterity

Practical STEM and skills programmes for ages 4 to 17.

03

Vanterest

Notes, guides, tools and conversations for real work.

04

Vantsphere

Discover Vantforge programmes, initiatives and ways to take part.

SELECTED PROGRAMMES AND INITIATIVES

Practical routes bring the wider idea to life.

Programmes can serve organisations, young people, independent learners and partners.

01	FORGE CONSULTING	Digital services and operating improvement shaped around a clear outcome.
02	FORGE ACADEMY	Guided learning and practical skills for different stages of development.
03	FORGE KITS	Supported access to devices and tools, with setup, guidance and follow-up.
04	VANTFORGE BRIEFS	Short resources that help people decide, plan and try something useful.

Explore the route that fits what you want to build, learn or support.

WHAT GUIDES THE WORK

The principles stay constant as the work changes.

01	02	03	04	05
Start with context	Make it usable	Build responsibly	Leave capability	Use evidence
Understand the people, work and constraints before choosing tools.	Build for real behaviour, support and everyday work.	Use practical technology and human checks where judgement matters.	Help people understand and sustain what has been built.	Let feedback and service data shape the next decision.

Useful. Clear. Grounded in evidence.

Choose the route that matches what you need now.

01

Build or improve

For teams and organisations shaping, launching or strengthening a digital service.

02

Learn or explore

For people looking for a focused learning route, practical ideas or skills programmes.

03

Partner or support

For schools, sponsors and collaborators interested in programmes or co-created work.

Bring the situation. We will help shape a sensible first step.
